Your measurements

Measure in millimetres. Take each width three times and use the smallest. Our guide at belwoodandroe.co.uk/how-to-measure-for-a-vanity-unit shows how.

Name _____ Date _____

Room _____ Unit you like _____

Width at the top Step 1	mm
Width in the middle	mm
Width above the skirting	mm
Smallest width, less new tiles Your space: the cabinet you order, plus 20mm for the worktop, must fit	mm
Fitting wall to wall in a recess? If yes, send us this sheet before you order and we'll make the top to fit	Y / N
Depth available Wall to door swing, toilet or bath	mm
Lowest obstacle above the unit Sill, socket, radiator	mm
Waste pipe: height from floor Step 4	mm
Waste pipe: distance from side wall	mm
Water pipes: from the floor or the wall?	
Narrowest door or stair turn Step 6	mm

Sketch your room

Mark the walls, door, window, toilet, bath and where the pipes come out. Each square is a guide only.

Walls are rarely straight
Measure at three heights and use the smallest width.

Keep pipes close to the wall
Units with open shelves need the pipes to come out of the wall.

Not sure? Ask us
Send this sheet and a photo of your pipework. We'll check it fits.
